

FROM PRINCIPAL'S DESK

Towards the later half of the twentieth century Rangapara College was established with a motto of creating an atmosphere of moral incandescence in learning process coalescing it with the symmetrical academic activities. However, with the advent of the twenty first century the Academic Scenario of the globe starts changing accentuating the need of mingling life skills with value based education system. Today's education aims at equipping the students for the global job market along with inculcating social responsibility. It is a matter of worry that the spread of education in all the part and sectors of the country is not congruent causing imbalances between urban and rural areas as well as among different regions. The case of our region is also not dissimilar from this. Keeping in mind the social, economic and educational backwardness, this institution was started with a purpose of removing the retrogressive circumstances of the region. After forty years of its pietistic passage, Rangapara college has enabled itself as a remarkable institution in the academic scenario of the state. In a world where unmitigated materialism and individualism have created a predicament of ambivalence among the youths, it is the need of the hour to provide an educational environment which can guide the society in the right direction. Keeping in view this social responsibility, Rangapara college is endeavouring hard to concoct citizens who are employable, socially responsible and sensitive to the moral and humane emotions with the sole aim of creating a better world.

Dr. Ranjan Kalita Principal
